Generators

Valley offers a Waukesha Certified Overhaul Program

Factory Certified Overhaul Facilities

Valley works closely with Waukesha Engine personnel to insure that your engine will be overhauled to meet the most stringent standards. Our facilities, tools, equipment and gauging are all inspected routinely for proper functionality and current calibration.

Factory Trained Technicians

Valley's technicians are factory trained and certified and must pass annual recertification tests to retain their factory certification.

Extended Warranty

Certified overhauls receive an extended warranty on parts. The warranty period is extended to 18 months on specific critical wear items, including complete engine and/or cylinder heads that are overhauled in a Certified Overhaul Facility
